

Xspect Wireless

Wireless Teach Pendant - Don't be tied to your CMM!

"Xspect A Revolution"

The Worlds 1st CMM Wireless Teach Pendant Ergonomically designed with full function performance and more. Check it out!

The worlds first wireless Teach Pendant utilizing blue tooth technology is now available with all new Wenzel CMMs, OpenDMIS retrofits on your existing CMM or with an Xspect Xsperienced CMM.

Ask any video gamer; they know the importance of Pendant ergonomics. Huge investments are made by the gaming industry to constantly improve Pendant functionality and ergonomics.

Why not so with CMM Industry Pendants!!!! Take an in-depth look at the Teach Pendant that comes with new CMMs today; they have all remained **unchanged for years even decades**. Why so???

The Wenzel HT400RC represents a true "state of the art" Pendant that was ergonomically researched and includes many practical features typically not found on traditional CMM pendants

Complete with hand strap, belt clip and magnetic holder the HT400 eliminates the risk of accidental Pendant damage through dropping or knocking off the CMM table. Typical rechargeable battery life exceeds 8 hours of CMM usage. The ergonomically designed single joystick maximizes CMM productivity; its weight and balance perfectly matched for the application. The Joy-Mouse™ eliminates the tedious keyboard interaction necessary with other CMMs and offers both machine and part joystick operation with full speed control.

Now Measuring Freedom

CNC Speed Potentiometer

Rechargeable Battery Indicator

Joy-Mouse™- Software control via joystick including mouse click functions

Individual Axis Locks

Programmable fast and slow mode key for joystick and CNC

Function keys for Probe index, Go-To and Point Record
